

**REMARKS**

This application is a continuation of 09/615,871, now U.S. Patent No. 6,690,391. This preliminary amendment is submitted to replace the originally submitted claims with new claims. Such new claims are supported by the specification and drawings, for example in Figs. 4-19 and associated text, as well as other locations. Clearly, no new matter is involved.

A new title is submitted herewith which is believed more succinct and more reflective of the subject matter of the current claims. Applicant respectfully requests that this new title be accepted and entered into the patent office records.

The specification has been amended to reflect the current status of the parent application.

Examination and allowance of all claims is respectfully requested at an early date.

Respectfully submitted,

Jerry A. Miller  
Registration No. 30,779

Dated: 4/15/2005
